RUBEN TADEIA

DevOps Engineer | Game Developer

Lisbon, Portugal | rubenmotadeia | rubenmotadeia | rubenmotadeia.github.io

PROFILE

Engineer with 4+ years of hands-on DevOps experience in infrastructure automation, CI/CD, and cloud services, backed by a broader software development and system administration background. Co-founder of Comfy Penguin Games, currently developing an indie title in Godot.

EXPERIENCE

DevOps Engineer

Blip

July 2022 – Present | Porto

Promoted from Associate DevOps Engineer, Nov 2024

- Leading the Helm chart migration across multiple domains, defining a tiered rollout strategy and coordinating cross-team delivery
- Led the migration from AWS IAM access keys to IAM roles across services, authoring the technical approach and guiding developers through adoption
- Built Python CLI tools for infrastructure automation including Netbox API integration, AWS KMS encryption workflows, and Consul service management
- Upgraded Amazon MSK clusters (Kafka 2.8 to 3.9) and provisioned AWS infrastructure with Terraform including staging environments and backup policies
- Mentoring junior engineers, currently supporting a second mentee's technical growth

System Administrator & DevOps Engineer

NOS

Feb 2020 – July 2022 | Lisbon

- Automated deployment workflows using Jenkins, cutting manual effort significantly
- Designed CI/CD pipelines to standardize releases across teams
- Built a Python API for secure credential storage using HashiCorp Vault
- Configured network infrastructure with F5 load balancers

Software Developer & Data Analyst

NOS

Nov 2019 – Feb 2020 | Lisbon

- Built data migration pipelines to transfer customer records into Redis and Django databases
- Leveraged StreamSets for data transformation and message queue integration

Software Developer

COLLAB

July 2019 – Nov 2019 | Lisbon

- Developed call centre applications in C#, .NET, and T-SQL for enterprise clients
- Deployed on-site in Barcelona for one month to deliver a custom client integration

TECHNICAL SKILLS
